## VINEBURG NEWS ITEMS CITY TRUSTEES IN NOVEMBER SESSION

"Easy Jim" Tells in an Interesting Way all About the Week's Happenings in and About His Section of the Valley.

Fred Norrbom of Sonoma has the contract for plastering the Roque residence near this place.

Carl Dresel & Co. shipped a corload of their celebrated grand prize wine east on last Wednesday eve.

Fred Batto, accompanied by Miss Adele Andrieux, paid Petaluma a visit on business Wednesday afternoon.

Louis Breitenbach, teamster, contractor and all-around man of Sonoma, transacted business here on Sunday.

Andre Castex, the well known popular proprietor of the Pioneer French Bakery of Sonoma, was a Vineburg visitor last Sunday.

Mr. and Mrs. Ross and family, who reside near here, enjoyed several days motoring in their auto around the bay cities last week.

Wonder who will win that bet made between Grover Rubke and Jim Small. Can't some one down this way throw some light on the subject.

"Happy" Harry Andrieux, Marshal of Wingo, passed Batto's spur on Sunday last and sure he did not forget his friends. Oh, you jack rabbits!

Joseph T. Groskopf, chief engineer of the Gundlach-Bundschu Wine Co., was a visitor to the bay cities on Sunday last on important business.

Henry Pape, the genial mixologist of E. Forni's Pleasant Villa, went duck shooting on Wednesday last and got the limit. They were certainly a fine bunch of birds.

Edward Mitchell, a prominent poultry man on the Hyde tract, visited the metropolis on Sunday, where he transacted business and returned on Tuesday well pleased with his trip.

Mr. Truesdale of Buena Vista has just completed plastering the handsome residence of Mr. John Wadsworth on the Hyde tract and the building is nearing completion. It is one of the most attractive on the tract.

Eph Cutter, assisted by his young business manager Cedric Cutter, is now busily engaged in pruning his well kept orchard near here, and when it comes to orchard work "Teddy" knows his business as well as his pa.

This part of the valley is certainly on the improve and any one would think so from the amount of work being done in around this place. From Buena Vista to Shellville everything is coming our way. Just keep a coming.

Pruning of fruit trees and grapevines is now under way in this part of the valley.

Mr. and Mrs. Arthur Batto, Charles Groskopf and Miss Jessie Hiser motored to Santa Rosa last Sunday and report a pleasant trip to the City of Roses.

It is rumored that this place is to have a new club. In case it does not rain soon it will be dubbed the "Box Car Irrigation Club." Most of the directors will be local capitalists.

We don't think it fair to invite one of our young society gents for a joy ride and after he had paid for a swell supper compel him to ride home without one of the fair sex seated beside him. But some people are peculiar, don't you know.

Winemaking is now about over and the two large wineries of this place—the Gundlach-Bundschu Co. and Dresel & Co.—have crushed a large amount of grapes. The reputation of these firms for producing fine, sparkling wines is world-wide and this year's vintage is bound to add to the reputation of Sonoma Valley wines.

Vineburg, Nov. 9th, 1911.

Friend Easy: Please excuse my frankness for the manner in which I address you, but now in "polite society" the word "dear" is omitted in one's correspondence. Well, I arrived from Honolulu safe and brought my suit case and a good appetite with me. Honolulu is like all other cities—a lovely place to enjoy one's self in as long as the money holds out. Good thing I had a return ticket, else I would not be writing to you now. Well, one thing I noticed during my absence, and that was "complexion" is just as cheap in Honolulu as in Vineburg, but it is not as good in quality as one can get from Simmons, the Sonoma druggist. I cannot write much this week about my trip, as I have so many social engagements to fill, and I am too busy—El Verano, Monday; Alta Vista, Tuesday (I love Alta Vista and can always see my old school mate, Otto); Wednesday, Buena Vista, to inspect the new residence of E. Guyot; Thursday, a joy ride to the Hyde tract. Those will be my calls this week. Oh, by the way, I hear that since the last vintage festival here that all the unmarried ladies are humming a ditty entitled "I Wish I was a Fish." I wonder if they want to be caught. That dear old girl, Ethel Eastlake, has just sent up her card, so please excuse Yours,

Viola Vineburg, Nov. 8th, 1911.

## Special Meeting of City Trustees

A special meeting of the Board of City Trustees was held Tuesday evening, Trustees Wagnon, McDonnell and Dal Poggetto with Mayor Cummings in the chair, were present.

The meeting was called for the purpose of considering the application of septic tank contractor Matthews for an extension of time in which to complete his contract.

On motion of Trustee Wagnon, seconded by Trustee McDonnell, the contractor was granted six working days extension of time.

No other business coming up for consideration the Board stood adjourned.

Railroad Activity.

The gap between Willits and Eureka is being gradually reduced by the Northwestern Pacific Railroad company, and it is only a question of time when Sonoma and the other counties north of San Francisco will have a transcontinental railway system.

Last week the two crews engaged in building the 800-foot tunnel met, and the last rails and ties are now being laid between that point and Willits. It is confidently expected that trains will be running between Willits and Fort Bragg before the first of December.

Completing the California Western Railroad, connecting Fort Bragg with Willits, marks an important epoch for the Mendocino coast section, which includes Caspar, Mendocino City, Point Arena, Fort Bragg, and other points on Mendocino's western seaboard, as it opens that county to the outside world. The road is the outgrowth of the original logging road built by the Union Lumber Company of Fort Bragg. After the logging road had been constructed a considerable distance into the redwoods, the lumber company decided to keep on to Willits.

For the past two or three years passenger trains have been operated from Fort Bragg to the end of the line, connection being made with Willits from there by stage, and each season the gap grew shorter as the road was pushed nearer and nearer toward Willits, its eastern terminus. The work has been carried on slowly but steadily, and the road substantially constructed, heavy rails, permanent bridges, and the best possible roadbed having replaced the original logging road in which the California Western had its inception. During the past few months work has been carried on actively from Willits, so the completion of the tunnel practically marks the conclusion of construction work.

Young Man Goes to Prison For Five Years.

G. H. Carboni, who pleaded guilty to seducing a young girl at Geyserville, was sentenced to serve five years in Folsom penitentiary by Judge Seawell last Monday.

Carboni wanted to marry the girl and she was willing, but under the laws of the state the girl was too young to enter the bonds of matrimony and the marriage could not be performed. The prisoner stated that when he was released he would make the girl his wife and in the meantime would provide for her maintenance. The case is an unusual one. Carboni is a hardworking fellow and says that he loves the girl and will right the wrong.

For Sale.

Bed room set, two single, enameled iron beds complete, two chiffoniers, folding bed, black walnut wardrobe and odd pieces of furniture.

For further information apply at LUTGEN'S CANDY STORE.

Miss Amy Rowe, a milliner of 7 years experience, has arranged to take charge of the hat trimming department of G. H. Hotz's store. Bring in your hat and have it made new. G. H. Hotz.

## AMID THE RUINS OF RECENT FIRE

Great Activity in Clearing the Ruins and Rebuilding—Pinelli and Barbarin Buildings Will be a Great Improvement on Those Destroyed.

Great activity is being manifested amid the ruins of the recent fire which destroyed almost an entire block of buildings on First-street East in this city.

The Pinelli building, the walls of which were left standing, is being rapidly rebuilt and when completed will be better in all its appointments than was the old structure. Last week the contract for the tinning work was let to J. A. Kinsella, a local plumber. Next week Mr. Pinelli will invite sealed proposals for painting the building and it will soon be ready for occupancy.

Mrs. Louisa Barbarin, owner of the lot adjoining the Pinelli building, where was located the Old City Bakery before the fire, has a large force of workmen engaged in rebuilding a handsome brick building, which when completed will be used for bakery purposes. This building, like the Pinelli edifice, will be an ornament to that portion of our town.

The von Geldern lot is being cleared of all debris, and the adobe walls, which were left standing after the fire had destroyed the interior, are being taken down and the adobe bricks will be used in restoring the old Mission San Francisco de Salano buildings.

As to whether or not Mr. and Mrs. von Geldern will rebuild when the lot is cleared of the rubbish, we are not as yet advised.

The walls of the big two-story concrete building in which was housed the store of Mrs. J. A. Popp, have been torn down and the debris is being carted away. When the lot is cleared Robt. A. Popp, whose law offices were located in this building will erect a fine office structure on a portion of the burned area.

The Modini heirs, Mrs. A. Beretta and Jas. L. Modini, will also rebuild another hotel to take the place of the one destroyed in the big conflagration, if a desirable tenant can be secured.

Grace Bros. Brewery Narrowly Escapes Destruction by Fire

A fire broke out in the upper story of Grace Bros. big brewery in Santa Rosa at noon last Sunday, and for a time threatened the entire destruction of the valuable plant. An alarm of fire was turned in and in a short time the fire department had three streams playing on the blaze, which was confined to the upper section of the brewery. The fire was got under control before much damage was done. The loss will be between \$300 and \$400 only.

For Rent

At very low rate to right party, five-room bungalow furnished with all modern conveniences at corner of the Glen Ellen and Agua Caliente roads. Apply to O. Williams, Agua Caliente, or on premises.

## PERSONAL AND SOCIAL NOTES AND HAPPENINGS IN TOWN

Doings of the Various Sets in this City and Immediate Vicinity—The Goings and Comings and Other Items of General Interest.

The weather is beautiful.

Norman J. Heggie transacted business in Santa Rosa last Tuesday.

The win-growers of Glen Ellen give their annual ball at Chauvet Hall this (Saturday) evening.

Mr. and Mrs. Jack Valente were here from San Francisco Sunday visiting their Sonoma relatives.

The regular meeting of the Ladies' Aid Society will take place at the home of Mrs. O. B. Shaw, on Tuesday, November 14th.

Howard Nauman, the wellknown insurance man of San Francisco, was in town Wednesday and Thursday, the guest of Mr. and Mrs. H. F. Bates.

Mr. W. C. Booth of Berkeley, and largely interested in Watsonville, Caliente Park, was in town Wednesday and paid this office a pleasant call.

J. T. McQuiddy has returned to his home here after an absence of several months in Watsonville, where he has just finished a big building contract.

Dr. A. M. Thomson has purchased a new Hudson car, which is being greatly admired by automobile experts. It is both handsome and speedy.

The lower end of Napa street inside the town limits is being repaired with the debris from the concrete walls of the Poppe building destroyed by the recent fire.

Mr. and Mrs. Frank P. Dunstan of Sacramento were presented with baby twins on October 30th—a boy and girl. Mrs. Dunstan is a niece of Mrs. G. A. Goess of this city.

The lecture delivered at the Congregational church by Probation Officer Plover, under the auspices of the Men's League, on Sunday evening last, was listened to with marked attention by a large audience. His subject was "The Problem of Children."

C. Valente, an uncle of Jep Valente, who recently purchased a home here, has been in town all week. Mr. Valente, who is a business man in San Francisco, will shortly dispose of his business in that city and with his wife will reside here permanently.

It Isn't The Price.

you pay for your shoes. It's the value you get for your money that tells whether you are buying wisely or not.

We claim to give the most for the least money and we are ready to prove it to you. Here is a genuine Good Year Welt Boot that we sell for \$7.00, another for \$5.00. All we ask of you is to compare our shoes and prices and we are certain of getting your trade.

### World-Renowned Snow Sheds of Southern Pacific System

Thirty-five miles of snow sheds over the summit of the Sierra Nevada mountains costing an average of \$203,615 each year to maintain and protect from fires, is the record shown from a recent combination of the operating expenses of this important part of the Southern Pacific lines. The average of \$203,615 was reached by the use of the operating expenses for the years 1907, 1908, 1909 and 1910. On account of fires in the snow sheds the annual expense is placed at \$46,565. Renewals on account of wear are placed at a little more than \$67,000. The repairs to the snow sheds cost an average of more than \$40,000 annually. They will be much heavier this year on account of the heavy storms of last winter. Patrolling and watching the sheds cost \$25,000 annually, and \$24,000 is set against the item of fire trains.

The Southern Pacific maintains one of the most complete fire organizations in existence for the protection of these sheds. Throughout the entire thirty-five miles the Gamewell fire alarm system has been installed, an alarm box being placed at a distance of a little more than a mile apart from one end of the sheds to the other. First class fire stations with complete fire fighting apparatus are maintained at Blue Canyon, Truckee and Summit, and at the first intimation of a fire these stations are notified through the alarm system. A fire train is also maintained at Chico, within the sheds, and although Chico is not an alarm station the engine from that point is usually first at the scene of a blaze, notification being sent by telephone from the lookout station on Red Mountain, this lookout station commanding the entire westerly view of the 35 miles of sheds.

The lookout station is equipped with a powerful spy-glass and a charted map of the sheds and at the first sign of fire the lookout is able to direct the Chico station to the immediate location. During the four years mentioned above fires within the snow sheds have cost the Southern Pacific Company \$186,262.17. The officials estimate that it would cost more than two and a quarter million dollars to replace these sheds, should they be destroyed by fire at any time.

### The Hay Market

Somers & Co. of San Francisco report the condition of the hay market for the week ending the 7th inst. as follows:

"Receipts of hay the past week have amounted to 3153 tons, a trifle less than the week preceding although quite a considerable quantity for this time of the year. A very large portion of the arrivals have considerable alfalfa, coming in by boat from the river district, the farmers being able to cut and harvest late crops on account of the continued lack of rain. All the grain hay which has arrived has moved off fairly well, although trade still continues quiet. Prices, however, are maintained and whatever is held in first hands in the country can be purchased only at high figures.

"Within a few days of the report of stocks of hay on hand in the county on the first of November, as compiled by the San Francisco Hay Association, will be issued and this report will be the first accurate estimate of the condition of hay stocks for this season. Last year there was an enormous stock on hand, something over 280,000 tons being available for San Francisco. That the supply at present is a great deal less than this quantity is generally conceded, although the exact estimate is not known at present. This report will probably

Sonoma, California.

### Trustees Will go to Alameda

The Board of City Trustees will visit Alameda on Monday, November 20th, to look over the streets of that city under the guidance of its street inspector. The object of the visit is to get pointers on street improvements. Citizens in this city who desire to join the Trustees at the railway depot here and participate in the inspection will be welcome.

### The Heaviest Swing Span in the World.

On the outskirts of the City of Sacramento, California, the Southern Pacific Company is erecting a steel bridge across the Sacramento river that contains the heaviest swing span of any bridge in the world. This span is 400 feet in length and its weight is 6,300,000 pounds. The entire bridge, however, will weigh more than 10,000,000 pounds when it has all been placed in position upon the heavy piers.

There are only two steel bridges in the world that have swing spans that exceed the new Sacramento river bridge in length. One is across the Willamette river and is a part of the Spokane, Portland and Seattle railway system. Its weight, however, is only 5,400,000 pounds, 900,000 pounds less than that of the Sacramento river bridge. The Omaha Terminal Company operates a large steel bridge across the Missouri river that has a swing span 520 feet in length, but the steel is of much lighter construction, the weight being only 5,000,000 pounds.

The new Sacramento river bridge of the Southern Pacific is a part of the double tracking of the Harri-man lines. It will contain not only two tracks for the trains but a concrete wagon and automobile road. The American Bridge Co., which is fabricating the steel work for the structure, have records of numerous heavy swing spans but none that can equal that of the new Southern Pacific bridge.

The piers of this structure were sunk by the pneumatic process under the direction of the Southern Pacific engineers, and the construction of the abutments, as well as the erection of all of the steel superstructure, is being done by the company's engineering forces.

### St. Francis Church—Change in Time of Services.

Commencing with Sunday, 1st October, the services on Sunday mornings at St. Francis Church will be as follows:

First Sunday of the month, 8.30 a. m. The remaining Sundays at 10.30 a. m.

Mass at Glen Ellen 1st Sunday of month at 10.30 a. m. The remaining Sundays at 8.45 a. m.

# Ordinance No. 120.

An Ordinance Fixing and Regulating the Use of Sewers by Private Individuals in the City of Sonoma, County of Sonoma, State of California.

The Board of Trustees of the City of Sonoma Does Ordain as Follows:

Section 1. The Sanitary Sewer System of the City of Sonoma consists of Main and Lateral Conduits of salt-glazed, vitrified earthenware, known in commerce as first class, with necessary accessories. They are designed to carry off all liquid house waste and are known herein as sanitary sewers. The sewers in the streets passing in front of the various lots are called main or lateral sewers. The sewers leading from the main or lateral sewers to the property on either side are called house sewers.

## Connections—How Made

Sec. 2. All connections of house sewers, or plumbing work with the sanitary Sewer System of the City of Sonoma shall be made in accordance with these rules and regulations.

Sec. 3. No person, firm or corporation shall make any connection with the Sanitary Sewer System of the City of Sonoma unless regularly licensed by the Board of Trustees of said city, except in case of laying vitrified ironstone pipe on private property, and then only under the supervision of the Superintendent of Sewers and in accordance with these rules and regulations.

## Applications for License

Sec. 4. Any person desiring to do business as a plumber or sewer pipe layer in connection with the Sanitary Sewer System shall file in the office of the City Clerk a petition giving the name of the individual or firm and the place of business, and asking to be licensed as a plumber or pipe layer. Said petition must be signed by two responsible citizens of the City of Sonoma vouching for the business capacity and the reputation of the applicant; that he is a master of his trade, and willing to be governed in all respects by the rules and regulations which are or may be adopted by the Board of Trustees of said City of Sonoma. Each applicant for a license shall execute and deposit in the office of the City Clerk, with his application, a bond with two or more resident sureties, to be approved by said Board of Trustees, in the sum of three hundred dollars, conditioned that he will indemnify and save harmless the City of Sonoma from all accidents and damages by any negligence in protecting his work, or any unlawful, imperfect or inadequate work done by virtue of his license, and that he will also replace and restore sidewalk pavement or street surface over any opening he may have made to as good a state and condition as he found it, and keep and maintain the same in good order, to the satisfaction of the Superintendent, for the period of six months thereafter, and that he will pay all fines imposed upon him for a violation of any of these rules or regulations. On receiving his license he shall have recorded in the office of the City Clerk his actual place of business, the name under which the business is transacted, and shall immediately notify the Superintendent of any change in either thereafter. No license will be granted for more than one year, and all licenses will be granted to expire one year from date of issue. Removal of residence from the city shall act as a forfeiture of the license. A fee of Five (\$5.00) Dollars shall accompany the application for license, which shall be paid into the Sewer Fund.

## Permits for Connections

Sec. 5. Applications for permits to connect with the sewer system or do plumbing work to be connected therewith must be made in writing by the owner of the property to be drained or his authorized agent. Such application shall give a precise location of the property, the name of the owner and the name of the person employed to do the work and shall be made on blanks furnished for the purpose. No permit shall be deemed to authorize anything not stated in the application, and for any misrepresentation in such application the plumber shall be suspended, and if such misrepresentation appears to be willful his license shall be revoked. Permits to make connection with the sewer system will be issued only when the plumbing in the house or building to be connected is in accordance with the rules for plumbing hereinafter prescribed and has been inspected and approved by the Superintendent of Sewers, or in case of new buildings has been approved by the Superintendent. The Superintendent will designate the position of the "Y" branch in the street, as shown by the records in the Superintendent's office. All connections made with the Sanitary sewers and all plumbing connecting therewith shall be made under the direction of the Superintendent.

## Plans of Plumbing

Sec. 6. Before a permit will be issued for doing plumbing work in a building, or before any additions are made, excepting necessary repairs, a plan and description of the work to be done, signed by a licensed plumber on blanks furnished for the purpose, shall be filed in the office of the sewer department, and no such work shall be commenced until such plans have been approved by the Superintendent.

Every plan shall contain a clear and full description of the plumbing, showing the position, size and weight of all pipes, and the position and kind of

work done under such plans shall be subject to the inspection of the Superintendent and no alterations shall be made in any place or in the work, without a special permit from him.

## Inspection

Sec. 7. The Superintendent is to be given notice when any work is ready for inspection, and all work must be left uncovered and convenient for examination until inspected and approved. Such inspection shall be made within twenty-four hours after such notification. The Superintendent shall apply the water test, and the plumber shall furnish all necessary tools, labor and assistants for such tests. The plumber shall remove or repair any defective material or labor when so ordered by the Superintendent. The plumber shall pay to the Superintendent a fee of one (\$1.00) Dollar for permit and inspection of same, and he shall receipt to him for same. All moneys received by the Superintendent of Sewers shall be paid to the Treasurer of the City of Sonoma to be used for the sewer fund.

## Statement of Work Done Must Be Filed

Sec. 8. The plumber shall, on the completion of the work, file in the office of the Sewer Department on blanks furnished for the purpose, a correct statement of the work done under the permit.

## Cesspools, Overflows, Etc.

Sec. 9. No open gutter, cesspool or privy vault shall be connected with any sewer. Cistern and cistern overflows may be connected with the sewer only when they can be trapped in such a manner that the water seal cannot be destroyed.

## Injury to Sewers

Sec. 10. No person, firm or corporation, shall injure, break or remove any portion of any manhole, lamp-hole, flush-tank, catch-basin or any part of the sewer system, or throw or deposit or cause to be thrown or deposited in any sewer opening or receptacle connecting with the sewer system, any garbage, offal, dead animals, waste water from gas works, vegetable parings, ashes, cinders, rags, or any other matter or things whatsoever except faeces, urine, the necessary water-closet paper, liquid, house or mill slops.

## Water and Gas Pipes

Sec. 11. Any person, firm, or corporation desiring to lay pipes, for water, gas, steam, or for any purpose in any streets or alleys upon which sewers are laid, shall give at least twenty-four hours' notice to the Superintendent before opening the street, and the manner of excavating, for laying and backfilling over such pipe, shall be subject to the approval of the Superintendent. All such work shall be planned and executed so that no injury shall occur to any public sewer or to any house sewer constructed therewith.

## Obstructions

Sec. 12. The Superintendent shall have the power to stop and prevent from discharging into the sewer system any private sewer through which substances are discharged which are liable to injure the sewer or obstruct the flow of the sewage.

## Private Sewer Systems

Sec. 13. Before any private sewer shall be connected with the sewer system, the owner of the private sewer shall prove to the satisfaction of the Superintendent that it is clean and conforms in every respect with these rules and regulations, in which case the pipe-layer connecting with sewer shall pay a fee of \$1.00 for permit and inspection.

## Trenching

Sec. 14. The house sewer trench shall be dug so as to meet the public sewer at the position of the "Y" branch, as located by the Superintendent. The material thrown from the trench shall be placed so as not to obstruct, and so as to cause the least inconvenience to the public.

## Must Prevent Accidents

Proper barriers and lights must be maintained on the banks of the trench, to guard the public against accidents, during the progress of the work. In back-filling, the earth shall be carefully rammed or tamped, so as to keep the pipe in proper position and avoid settling, and no stone will be used in filling, until there has been a depth of one foot of earth or gravel placed over the pipe.

## Materials for Sewers

Sec. 15. The house sewer, from a point three feet outside of the house to the street sewer shall be of standard first quality, salt-glazed vitrified earthenware pipe, 1/2 inch thick, weighing not less than nine pounds per lineal foot unless laid less than one foot deep, when it shall be of standard cast or wrought iron. Its inside diameter shall be four inches. Outside the curb line it shall be four inches inside diameter, and the said line shall be trapped.

## Pipe Laying

Sec. 16. The cover of the "Y" branch of the sewer shall be carefully removed, so as not to injure the socket. The first length of pipe attached to the "Y" branch shall be curved and set so as to give a good fall into the sewer.

## Grade of Pipe

The pipe shall be laid on an even grade of not less than one-eighth of an inch to the foot, unless by special permission of the Superintendent, in which case provision must be made for regular and efficient flushing.

## Curved Pipe

Curved pipe shall be used for every deflection from a straight line of more than six inches in two feet.

## Materials to be Used

All joints in earthenware house sewers shall be made with mortar of the following proportion: One part of some well-known brand of artificial Portland cement, and two parts of clean, sharp sand, free from loam or clay, which shall be pressed into the bell of pipe until it is equally and thoroughly filled, and the face of the bell must be covered with mortar, and a rounding joint of same built up extending two inches from face of bell to next pipe. A swab or disc must be drawn at least two joints preceding the one last laid to remove all dirt or mortar.

The ends of all private sewers not immediately connected with plumbing fixtures shall be securely closed by

water-tight, impervious material. If lead pipe, the end must be soldered; if wrought iron pipe a plug must be screwed in the end; if cast iron pipe a cast iron plug must be caulked in with lead; if earthenware, with stopper of same material.

## Plumbing Rules

Sec. 17. All materials used must be of good quality and free from defects; the work must be executed in a thorough and workmanlike manner.

From a point three feet outside the foundation walls of a building no material other than Durham, galvanized wrought iron, or cast iron, shall be used, and connecting with the sewer for soil waste, or vent pipes other than cast iron pipes, with securely leaded joints. Cement or putty joints, tin or sheet iron pipes whether galvanized or not, shall not be used.

## Wooden Sinks and Urinals Prohibited

No sloop-hopper shall be used in connection with sewers. No wooden sinks or sinks lined with metal, or wooden wash trays shall hereafter be put in place of any residence or tenement which is to be used as a dwelling. Wooden urinals are strictly prohibited in all cases. All urinals must have a supply of water from faucets to properly flush them.

## Standard of Pipes

Sec. 18. All cast-iron pipes must be sound, free from holes or cracks, and of the grade known in commerce as standard, coated with tar, asphaltum or porcelain. The following weights per lineal foot will be accepted as standard:

- 2 inches 3 1/2 pounds per lineal foot.
- 3 inches 4 1/2 pounds per lineal foot.
- 4 inches 6 1/2 pounds per lineal foot.

All wrought iron pipe must be of standard weight.

## Pipe Fittings

All fittings used in connection with such pipe shall correspond with it in weight and quality. Where lead pipe is used to connect fixtures with vertical soil or waste pipes, or to connect traps with vertical vent pipes, it must not be lighter than "light pipe."

## Arrangement of Soil and Waste Pipes

The arrangement of the soil and waste pipes must be as direct as possible. The soil and waste pipes, and any traps should, if practicable, be exposed to view at all times for ready inspection. When necessarily placed within partitions or in recesses of walls, soil and waste pipes should be covered with wood work so fastened with screws as to be readily removed.

## Main, Soil and Waste Pipes

Sec. 19. A main waste pipe, into which wash basins, bath tubs or kitchen sinks discharge, must be at least two inches in diameter, with two-inch "Y" branches.

## Main Pipe

The main pipe from the sewer connection to the house tap must be at least four (4) inches in interior diameter at every point. No trap or any manner of obstruction to the free flow of air through the whole course of the main house sewer or soil pipe will be allowed.

This may be secured by an untrapped main house sewer and soil pipe, or if a trap is placed in the main soil pipe, by a ventilating pipe leading to the roof from the lower side of the trap and fresh air inlet connecting with the foot of the main soil pipe just above the trap.

## Soil and Waste Pipe

Every vertical soil pipe and waste pipe must be extended at least two feet above the roof coping. It must be of unadorned steel, without return bend, with open or basket end. It must not open less than ten feet from a window or an air shaft which ventilates living rooms, unless extended three feet above the window or air shaft.

## Clean-outs

Sec. 20. Heavy brass clean-outs with air-tight screw-joints shall be placed at the end of each horizontal line of cast iron sewer pipe and in no case shall they be less than four inches in diameter on the main horizontal line of cast iron sewer pipe, and the same size as the pipe on all other branches.

## Joints

Sec. 21. All joints in iron drain pipes must be so filled with oakum and lead and hand-caulked as to make them gas-tight.

## Connections

All connections of lead pipe with iron pipes must be made with a brass ferrule of the same size as the lead pipe put in the hub of the branch iron pipe and caulked with lead. The lead pipe must be attached to the ferrule as a wiped joint.

All connections of lead, waste and vent pipes must be made by means of wiped joints.

## Inspection

Sec. 22. Before the fixtures are placed in connection with the plumbing of any house or building, and before the soil pipe is connected with the sewer, the outlet of the soil pipe and all openings into it below the top shall be hermetically sealed; the pipe shall then be filled with water to its top, and every joint be carefully examined for leaks.

## Defective Pipes

Work already in place will be examined by the permit or other test; defective pipes discovered must be removed, and replaced by sound ones and all defective joints made tight, and every part of the work be made to conform to these rules and regulations, and subject to the approval of the Superintendent of Sewers.

In all cases the soil pipe shall pass through and above the roof. Traps are to be ventilated, fixtures and pipes cleaned and waste and soil pipes to have sufficient fall.

## Traps, Etc.

Sec. 23. Every water closet, urinal, sink, wash-tray, bath-tub and every tub or set of tubs must be separately and effectively trapped. Traps must be placed not to exceed 3 feet from the fixtures. In no case shall water from bath-tub or other fixture be connected with water closet trap.

## Sinks and Wash Rooms

Sinks in all packing houses, butcher shops, lard rendering establishments,

hotels, restaurants, boarding houses and laundries shall be provided with a suitable grease trap of not less than five gallons capacity. All wash rooms for carriages connected with the Sanitary Sewer System must be provided with proper means for intercepting mud by placing catch-basins under wooden grating, which catch-basins shall be made of brick and concrete or rodwood trapped with one quarter bend and vented.

## Vent-pipes

Sec. 24. Traps must be protected from syphonage, or the waste pipe leading from them ventilated by a special air pipe, taken out of the crown of the trap in no case less than two inches in diameter for water closet traps, except in back yards or outbuildings which can be vented below crown of traps, and one inch and a quarter for other traps, except when more than fifteen feet in length, when it shall not be less than one and a half inches in diameter. The vertical vent pipes for traps of water closets in buildings more than one story in height, must be at least three inches in diameter, with two-inch branches to each trap, and for traps of other fixtures not less than two inches in diameter, unless the trap is smaller, in which case the diameter of branch vent pipe must be at least equal to the diameter of the trap. In all cases vent pipes must be cast or galvanized wrought iron and connected to trap with brass or lead ferrule.

## Height of Vent Pipes

Vent pipes must extend two feet above the roof or coping. They may be combined by branching together those which serve several traps, provided the main vent is increased to equal in size the capacity of all vents attached thereto. These air-pipes must always have a continual slope to avoid collecting water by condensation.

No trap vent pipes shall be used as a waste or soil pipe. No brick, sheet metal, earthenware or chimney flue, shall be used as a sewer ventilation or to ventilate any trap, drain soil or waste pipe.

## Safe Wastes and Rain Water

Sec. 25. Every safe under a basin, bath, water closet, tank or other fixture must be drained by a special pipe of lead, galvanized iron or dipped pipe, one inch in diameter, and in no case connected with any soil, waste, vent, drain or sewer, but made to discharge outside of house. Urinal safe waste may be connected with main waste or soil pipe; provided suitable traps are provided to both urinal and safe wastes, and both properly vented and both supplied with water. Except in private residences urinals must be supplied from an automatic flush tank.

## Rain Water Conductors

Rain water conductors shall not be connected with the sewers.

## Overflows from Fixtures

Sec. 26. Overflows from fixtures must, in each case, be connected on the inlet side of the trap.

## Water Closets

Sec. 27. Water closets must be of an approved pattern (pan closets being absolutely prohibited) and must be supplied from a special tank placed over them, in which case the waste or overflow from the tank must discharge into the open air of the basin of the closet, and not into the soil pipe directly. Direct service of a water closet is prohibited except for jails and school houses.

## All interior water closet compartments should be ventilated into air shafts, if possible.

## Strainers

Sec. 28. Exit pipes to all fixtures except water closets shall be furnished with suitable, permanently-attached strainers.

Sec. 29. No person shall place or suffer to be placed any bulky substance in any sewer opening or in the house connections, or private drains connected with any public, main or lateral sewer or any substance having a tendency to obstruct the free flow of sewage, or to damage them in any way.

## Breweries

All breweries connected with the Sanitary Sewer must be provided with an automatic flusher of not less than 15 gallons capacity, and suitably trapped and vented with three-inch trap and vent pipe. No exhaust or steam pipe from boilers shall be connected with sewers.

## Penalty

Sec. 30. Any person violating any of the provisions of these rules and regulations shall be deemed guilty of a misdemeanor, and upon conviction thereof, be fined in any sum not exceeding two hundred and fifty dollars, or less than five dollars, or imprisonment in the City Jail for a period not exceeding ninety days, or by both such fine and imprisonment at the discretion of the Court.

Sec. 31. All buildings in the City of Sonoma in which the plumbing and connections are in place at the time this Ordinance goes into effect, which plumbing and connections are not strictly in accordance with the rules and regulations prescribed by this Ordinance, may yet be retained and used, provided they are approved by the Superintendent; but all new plumbing and work in the City of Sonoma must be done in literal compliance with the provisions established by this Ordinance.

Sec. 32. This Ordinance shall take effect and be in force from and after its passage, approval and publication. In Board of Trustees finally passed and approved, this 1st day of November, 1911, by the following vote:

Ayes: Trustees M. E. Cummings, Charles Dal Pozetto, R. A. McDonnell and John D. Wagon.

Noes: None.

Absent: Trustee L. Quartaroli.

M. E. CUMMINGS,

President of Board of Trustees.

(Seal) H. W. GOTTENBERG,

City Clerk of the City of Sonoma.

I hereby approve the foregoing Ordinance after its passage this 1st day of November, 1911.

M. E. CUMMINGS,

President of Board of Trustees.

Attest: H. W. GOTTENBERG,

(Seal) City Clerk.

## COMMITTS SUICIDE IN A SAN FRANCISCO LODGING HOUSE

Engelbert Kuner, a Resident of this Valley, Becomes Despondent Over Domestic Difficulties and Divorces His Wife by Killing Himself.

Engelbert Kuner, employed on the Gundlach-Bundschu ranch, one mile east of this city, the past four years, committed suicide in a San Francisco lodging house last Wednesday in a fit of despondency caused by domestic troubles.

The deceased and his wife, who was also employed on the same ranch as a domestic, became estranged and a short time ago the wife, taking their young son with her, left for San Francisco, where she subsequently commenced divorce proceedings.

The husband recently threw up his job on the Gundlach-Bundschu ranch and followed his wife to the city in the hopes of effecting a reconciliation, taking a separate room in the same lodging house where his wife and boy were domiciled.

On Wednesday, Otto the twelve-year-old son of the estranged couple, left his mother's room to

visit that of the father and upon entering the room found the latter lying on the floor shot to death with his own pistol. The dead man had anticipated the courts and given his wife the decree she sought by taking his own life.

The deceased was a native of Germany, and aged 46 years.

### Successful Entertainment

The first entertainment given by the ladies of the newly organized Episcopal church certainly established their reputation as knowing how to do things well. The play, "The Model Wife," was one of the prettiest ever seen in Sonoma. The costumes were very handsome while the stage setting had been arranged without regard to cost or labor. The different characters had been well chosen and carefully drilled and each one seemed to take a "star part."

Altogether it was a big success, artistically and financially, the hall being packed to the doors by an appreciative audience who remained late enjoying the dancing and good music and patronizing the various booths. We understand that the net profits were about \$260.

### Brief Mention

Dr. L. B. Lawson, specialist in fitting glasses of the Lawson-Rinner Optical Co., Santa Rosa, will be at the Union Hotel on Thursday, November 23d.

Subscribe for your local paper.

## LOCAL NEWS ITEMS OF INTEREST.

### SUES SONOMA BREWING COMPANY

John Steiner Resigns as President and Manager of the Company He Organized Two Years Ago, and Then Sues

John Steiner, ex-promoter, President and business manager of the Sonoma Brewing Co. Inc., on Thursday last, through his attorney Frank Sprague of this city, commenced suit in the Superior Court of this county against the company he organized two years ago to recover the sum of \$739.50 for alleged services. The suit is the outcome of a disagreement between the ex-president of the company, and the directors and stockholders of the corporation. The attorney for the brewing company is Col. J. W. Oates of Santa Rosa.

This suit, which was not entirely unexpected, will in wise interfere with the business of the brewery, which is here to stay.

### Y. M. I. Dance and Banquet

Sonoma Valley Council, No. 45, Y. M. I., gave a dance and banquet in honor of ten members who were initiated into the order last Wednesday night. Fifteen additional members will join the council at its next meeting. Before adjourning the members voted to make their ball in Union Hall on Thanksgiving eve one of the best ever given in this city.

### Sudden Death at Sonoma State Home.

Coroner F. L. Blackburn was called to Eldridge last Thursday to hold an inquest on a girl inmate of the Feeble Minded ward, who had died very suddenly that morning. It developed that the girl had dropped dead from heart disease.

### Henry Kissane Drops Dead - He Was a Brother Col. Rogers

Henry Kissane, a brother of the late Reuben H. Lloyd, and Col. W. K. Rogers, formerly of this place, dropped dead in his lumber yard in San Francisco last Wednesday. The deceased, who was an old pioneer, was well known in this valley in the early days. He was aged 83 years.

### Buy Cattle in Nevada

Sam Lewis of the firm of Lewis & Cummings has been in Reno, Nevada, all week purchasing beef cattle. He is expected home today with a carload of fine steers for the holiday trade.

### Personal and News Items

Mr. and Mrs. Adam Adler spent Tuesday in San Francisco.

Mrs. Geo. Saunders and Miss Ida Saunders visited Healdsburg relatives several days this week.

Dr. W. K. Vance, who married Amelia Ehrlich in this place a number of years ago, is now practicing medicine in Fresno.

The funeral of the late P. Monahan of Glen Ellen, which took place from St. Francis church in this city Saturday morning, was largely attended by relatives and friends.

Miss Ernestine Fisher, sister of Mrs. Albert Kerner, was here from San Francisco a few days this week. Miss Fisher, who is an expert with rod and gun, bagged a fine bunch of quail during her short sojourn here.

Mr. and Mrs. C. Kopf, Mrs. Katherine Kopf and Mrs. M. Bayer of Santa Rosa autted to this place Sunday to visit Mrs. L. Breitenbach and family. This was Mrs. Katherine Kopf's first visit to Sonoma for at least 35 or 40 years. The old lady who is 76 years of age, recently registered in Santa Rosa. During their stay here the party took in the old Mission buildings and other ancient landmarks of California's oldest city.

### Business Personals

META-C. STOFEN Librarian.

### SUPERIOR COURT CALENDAR DAY.

Judges Seawell and Denny Preside in Their Respective Departments Monday

There was a number of interesting matters in both departments of the Superior Court Monday, that day being the regular calling of the calendars.

In Judge Seawell's department thirty days additional time was granted in the suit of Burton vs. Northwestern Pacific railroad, to prepare and file a bill of exceptions on appeal.

The suit of Nonella vs. Mathewson was submitted.

The trial of the suit of Haskins vs. Haskins, was vacated. The trial of the suit of James Canby vs. Northwestern Pacific railroad company was set for January 3.

Default of defendant was entered in the suit to annul marriage of Neep vs. Neep, and the trial was set for November 13.

The suits of Gilardoni vs. Gilardoni, Smith vs. Persons, Citizens Bank vs. Stewart, Mark Lally Co. vs. Smith, Green Valley Can. Co. vs. California Cannery Association to November 13; Batchelor vs. Elphick, to November 18. (Clerk instructed to inform Judge Buckles who will hear the matter.)

The suit of Hinshaw vs. White was set for trial for January 18.

The estate of Mathew Scanlon was set aside to the widow.

Partial distribution of the estate of Mary B. Collings was allowed.

The first annual account of the estate of Hazel Cook et al., minors was settled and allowed.

The homestead of the estate of John Vanderleith was set aside to the widow.

Sarah Tripp was named administratrix on the estate of Emma Withington in a bond of \$250.

Nannie Ackerman was named administratrix on the estates of Harriet Belle Keig and Mary Edith Ackerman in a bond of \$3,000.

A sale of real and personal property in the estate of Sarah J. E. Atkinson was confirmed.

Distribution was ordered in the estate of Lorenzo Prena.

Elizabeth McCutchan was named guardian of the estates Violet Sellons et al., minors, in a bond of \$3,000 to each minor.

A petition for an allowance in the estate of Mabel May Parent was submitted.

Frank L. Blackburn was named administrator on the estate of John Nuesch.

The citation was dismissed in the estate of J. W. Varney.

Default was entered and the suit of Trautner set for trial for November 9.

These matters were continued: Goodman vs. Smith, to November 20; Cardono vs. Wright, Reilly vs. Reilly, to November 13; estate of G. Carmada, to November 20.

Ladies' and gents' clothing cleaned and pressed. We make them look good as new by our process of dry cleaning. Parrent, The Tailor.

**Children Cry FOR FLETCHER'S CASTORIA**

## Silence!

The instinct of modesty natural to every woman is often a great hindrance to the cure of womanly diseases. Women shrink from the personal questions of the local physician which seem indelicate. The thought of examination is abhorrent to them, and so they endure in silence a condition of disease which surely progresses from bad to worse.

It has been Dr. Pierce's privilege to cure a great many women who have found a refuge for modesty in his offer of FREE consultation by letter. All correspondence is held as sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

Dr. Pierce's Favorite Prescription restores and regulates the womanly functions, abolishes pain and builds up and puts the finishing touch of health on every weak woman who gives it a fair trial.

**It Makes Weak Women Strong, Sick Women Well.**

You can't afford to accept a secret nostrum as a substitute for this non-alcoholic medicine of known composition.

## The Man That Makes A Hit

Is the man who wears good clothes. You can set that down as gospel, whether he's in business or love. We have on display right now a number of the latest examples of good clothes making which we have made for others, and from which you can gain an accurate idea of how really "classy" are the clothes we make. The cost is small. Come in and see us.

## PARRENT The Ladies and Gents Tailor

### Paint Troubles

come with poor paint. You can't be free from them unless you use good paint. The best good paint is THE SHERWIN-WILLIAMS PAINT

It is made according to uniform formulas from pure lead, pure zinc and pure linseed oil. The proportion of ingredients is just right to produce the best wearing paint possible. Grinding and mixing most thought. It is a paint made to prevent trouble.

The Defendant's Pleading.  
In a rural district in the west of England there lived an eccentric old farmer who was continually appearing before the magistrates for allowing his cattle to stray on the highway.

During the hearing of his case for a similar offense upon the last occasion he elicited much laughter from the presiding "gentlemen on the bench" and others.

The chairman, addressing the defendant, asked:  
"Do you plead guilty or not guilty?"

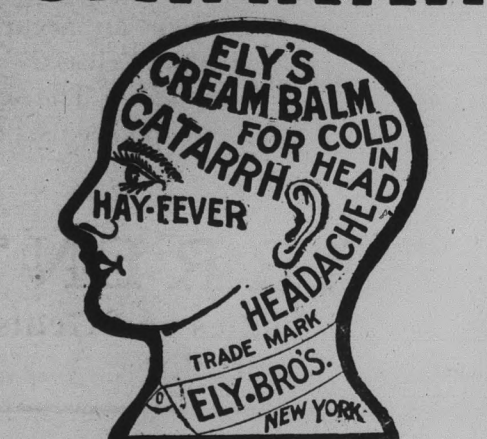

"Well, yer 'onor, I expects as I be guilty. But don't be too hard on a reg'lar customer."—Tit-Bits.

#### It Grows Feeble.

The attraction of a man's character is apt to be outlived, like the attraction of his body, and the power of love grows feeble in its turn, as well as the power to inspire love in others. It is only with a few rare natures that friendship is added to friendship, love to love, and the man keeps growing richer in affection—richer, I mean, as a bank may be said to grow rich, both giving and receiving more—after his head is white and his back weary, and he prepares to go down into the dust of death.—Robert Louis Stevenson.

Francisco, Cal. Hours 9 to 3

#### FOR SALE

MALANI RANCH—350 acres for  
sale. Running water in abundance.  
Building stone and basalt block  
quarries, and thousands of cords  
of stove wood on the place. The  
ranch is located two miles East of  
Sonoma and is easy of access. On  
the place is a dwelling, barn and  
outhouses and a vineyard and  
orchard. For further particulars  
apply at his office.

#### The Corset You Should Wear is

the Gossard. It laces in front, is un-  
breakable and rust proof. We fit  
them perfectly and make alterations  
if necessary.

MRS. J. B. PARRENT,  
Special Agent
